

**AMENDMENTS TO THE SPECIFICATION:**

On page 15, beginning at line 17 after the second full paragraph, please insert the following paragraph:

In examples of the invention, the tangible media includes a transmitter device configured to transmit bridge codes from tangible media to a client device. For example, a transmitter, such as a radio frequency transmitter or infrared transmitter, can be included with tangible media. To receive transmitted codes, an input device of a client device can include a receiver, such as a radio frequency receiver or infrared receiver.
